<tr><td>Position of CFS</td><td>• Information on product distribution outside France is not available from the website of Rappel Conso of France. The Centre for Food Safety (CFS) is investigating whether the affected product has been imported to Hong Kong and is</td></tr>
</table>

	contacting the relevant authority for further information. Preliminary investigation did not identify local sale or import of the affected product. • Acquisition of the product through online purchase or international travel cannot be excluded. • Consumers should discard the product and not consume it. • CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary. • Investigation by CFS is ongoing. • *Salmonella* infection may cause fever and gastrointestinal upset such as abdominal pain and diarrhoea. People with lowered immunity such as infants and the elderly could present with more severe and even life-threatening infection.
