Position of CFS	<ul style="list-style-type: none"> According to US FDA, the product is produced in Canada and is available in some regions of US. Information on product distribution outside US is not available from the US FDA website. The local trade has been alerted. Acquisition of the product through online purchase or international travel cannot be excluded. <i>Salmonella</i> infection may cause fever and gastrointestinal upset such as abdominal pain and diarrhea. People with lowered immunity such as infants and the elderly could present with more severe and even life-threatening infection. Consumers should discard the product and not consume it. CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary.
