Position of CFS	<ul style="list-style-type: none"> • According to AVA, the products are sold in Singapore and the recall by Danone Dumex was initiated as a precautionary measure. Information on products distribution outside Singapore is not available from AVA website. • The local trade has been alerted. • Acquisition of the products through online purchase or international travel cannot be excluded. • <i>Clostridium botulinum</i> may pose health risk to exposed individuals, in particular infants under one-year-old and immunocompromised adults, those using antimicrobials, or those with bowel abnormalities. Patients with intestinal botulism may present with constipation and poor feeding. • Consumers should discard the products and not consume them. • CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary
