Position of CFS	<ul style="list-style-type: none"> Information on product distribution outside the US is not available from the FDA websites. CFS is investigating whether the affected batch has been imported to Hong Kong and is contacting the U.S. authority for further information. Acquisition of the products through online purchase or international travel cannot be excluded. Consumers should discard the products and not consume them. CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary. Investigation by CFS is ongoing. Listeriosis is usually caused by eating food contaminated with <i>Listeria</i> which can be easily destroyed by cooking but can
