Heading	The Canadian Food Inspection Agency (CFIA) – Recall of a batch of Bombay Sapphire brand London Dry Gin in Canada because it may be unsafe due to high alcohol content.														
The incident	<p>CFIA issued a recall notice of a batch of Bombay Sapphire brand London Dry Gin in Canada due to high alcohol content. This recall was initiated upon noticing that one batch failed to achieve correct dilution before bottling. As a result, the affected batch has alcohol content by volume of 77%, rather than the stated 40%.</p> <p>Recalled product:</p> <table><tr><th>Brand Name</th><th>Common Name</th><th>Size</th><th>Code(s) on Product</th><th>UPC</th></tr><tr><td>Bombay Sapphire</td><td>London Dry Gin</td><td>1.14L</td><td>L16304 W</td><td>6 20213 19020 8</td></tr></table>					Brand Name	Common Name	Size	Code(s) on Product	UPC	Bombay Sapphire	London Dry Gin	1.14L	L16304 W	6 20213 19020 8

Position of CFS	<ul style="list-style-type: none">Information on product distribution outside Canada is not available from the captioned website. CFS is investigating whether the affected batch has been imported to Hong Kong and is contacting the relevant authority for further information. Preliminary investigation did not identify local sale or import of the affected batch.Acquisition of the products through online purchase or international travel cannot be excluded.Consumers should discard the products and not consume them.CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary.														

食物事故報表 Food Incident Post

	<ul style="list-style-type: none"> Investigation by CFS is ongoing. Alcohol has both immediate and long-term effects on health. Drinking alcohol in large amount in a short period of time can lead to acute harm due to accident or violence to oneself and others. It also increases the risk of intoxication, even death. The more alcohol consumed and cumulated over time, the higher the chance of suffering from a wide range of long term illnesses such as certain cancers (including cancers of oral, pharynx, larynx, oesophagus, liver, colorectum and female breasts), gastritis, gastric ulcers, liver cirrhosis, obesity, heart disease, stroke and mental illnesses. Pregnant women who drink alcohol have higher chance of giving birth to babies with birth defects, growth and developmental problems.
