contacting relevant authority for further information.

- Acquisition of the products through online purchase or international travel cannot be excluded.
- Coliforms are not a single species of organism. They are a group
 of closely related, mostly harmless bacteria that live in soil and
 water as well as the gut of animals. Coliforms count is a hygienic
 indicator and high level of coliform counts generally indicates
 unsanitary condition or poor hygiene practices during or after
 food production.
- Consumers should discard the products and not consume them.
- CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary.
- Investigation by CFS is ongoing.
