

# Regulation of waste cooking oils from food premises

- Through administrative measures to regulate the recycling of waste cooking oils to ensure that such oils upon disposal should not be used as ingredients for edible oils.
- Firstly, EPD will register local collectors, disposers and exporters of waste cooking oils.
- FEHD will impose additional licensing conditions to require all restaurants, factory canteens, food factories and bakeries to hand over their waste cooking oils to a collector, disposer or exporter registered by EPD for disposal and keep proper records.
- FEHD will issue warning to any licence holders found to be in breach of the relevant licensing conditions. For repeated breaches, FEHD will consider cancelling their licences.
