Definitions

Definitions

- Terms are defined in the Amendment Regulation
- For example, “nutrient” means any substance present in food which –
 - (a) belongs to, or is a component of, one of the following categories –
protein; carbohydrates; fat; dietary fibre; vitamins; minerals; and
 - (b) satisfies any of the following conditions –
 - (i) the substance provides energy
 - (ii) the substance is needed for growth, development and normal functions of the body;
 - (iii) a deficit of the substance will cause characteristic bio-chemical or physiological changes to occur.
