<b>Source</b>	<a href="http://www.food.gov.uk/news-updates/news/2013/mar/pascalite-powder">http://www. food.gov.uk/news-updates/news/2013/mar/pascalite-powder</a> <a href="http://www.pascalite.com/Prod.htm">http://www. pascalite.com/Prod.htm</a>
<b>Position of CFS</b>	<ul style="list-style-type: none"> <li>• According to UK FSA, the products are produced in USA. Information on product distribution is not available from the FSA website.</li> <li>• The local trade has been alerted.</li> <li>• Acquisition of the products through online purchase or international travel cannot be excluded.</li> <li>• Short term exposure to high levels of lead can cause abdominal pain, vomiting and anaemia, whereas chronic low-level exposure can cause retarded cognitive and intellectual development in children. Infant, young children and foetus are more sensitive to toxic effects of lead, especially in regard to the damages to their central nervous system.</li> <li>• Consumers should discard the product and not consume it.</li> <li>• CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary.</li> </ul>
