Position of CFS	<ul style="list-style-type: none"> • According to the CFIA, the affected product has been distributed in certain regions of Canada. Information on product distribution outside Canada is not available from the CFIA website. • The local trade has been alerted. • Acquisition of the product through online purchase or international travel cannot be excluded. • <i>E. coli</i> O157H:7 may cause symptoms like severe watery diarrhoea, bloody diarrhoea, fever, abdominal cramps or vomiting. Severe cases may develop haemolytic uraemic syndrome (HUS) characterised by acute kidney failure, and some may even die. • Consumers should discard the product and not consume it. • CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary.
