Position of CFS	<ul style="list-style-type: none">• Information on product distribution outside New Zealand is not available from the websites of MPI. CFS is investigating whether the affected products have been imported to Hong Kong. Preliminary investigation so far does not identify local sale of the affected products.• Acquisition of the products through online purchase or international travel cannot be excluded.• People who are allergic to milk may have immunologic response like vomiting, diarrhoea and rash upon consumption of food containing this allergen. In severe cases, anaphylactic shock may even develop. As for other members of the public, generally speaking, they would not be subject to such reactions when the food in question is consumed.• Consumers who are allergic to milk should discard the products and not consume them.• CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary.• Investigation by CFS is ongoing.
