Position of CFS	<ul style="list-style-type: none">• Information on product distribution outside Canada is not available from the website of Canada. CFS is investigating whether the affected batches have been imported to Hong Kong and is contacting the relevant authority for further information. Preliminary investigation so far does not identify local sale of the affected products.• Acquisition of the products through online purchase or international travel cannot be excluded.• People contract <i>E. coli</i>, which is a gastro-intestinal infection, through consumption of contaminated water or undercooked and contaminated foods. Intestinal bleeding and serious complications such as hemolytic uraemic syndrome (HUS) may also develop in some people. Moreover, due to poor personal hygiene, person-to-person transmission of this pathogen is possible through oral-faecal route. <i>E. coli</i> cannot survive under high temperature and can be killed by thorough cooking.• Consumers should discard the products and not consume them.• CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary.• Investigation by CFS is ongoing.
