	<p>them.</p> <ul style="list-style-type: none">• CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary.• Investigation by CFS is ongoing.• <i>Salmonella</i> infection may cause fever and gastrointestinal upset such as abdominal pain and diarrhea. People with lowered immunity such as infants and the elderly could present with more severe and even life-threatening infection.• <i>Listeriosis</i> is usually caused by eating food contaminated with <i>Listeria</i> which can be easily destroyed by cooking but can survive and multiply at refrigerator temperatures. Severe complications may occur, such as septicaemia, meningitis or even death in newborns, elderly and those with weaker immune systems; and miscarriages during pregnancy.
