	<ul style="list-style-type: none"><li>• CFS will remain vigilant and monitor for any new development and take appropriate actions when necessary.</li><li>• Investigation by CFS is ongoing.</li><li>• <i>Cronobacter sakazakii</i> is a pathogen that generally causes disease only in people with weakened immune systems. The bacterium can cause invasive infections (e.g. sepsis or meningitis) in infant. Neonates (<math>\leq 28</math> days old) and infants less than 2 months of age, in particular those that are pre-term, low-birth-weight (<math>&lt; 2.5</math> kg) and immunocompromised, are at greatest risk. Powdered infant formulae were established as the source of <i>C. sakazakii</i>.</li></ul>
