業界諮詢論壇  
Trade Consultation Forum

# 背景

# Background

# 糖對健康的影响

## Health effects of sugar

- 糖只含能量(每克糖提供4千卡能量)。
- 進食過多糖可能會令人攝取過多能量，增加超重和患上肥胖症的風險。
- 經常攝取過多的糖還會引至蛀牙。
- 肥胖症會增加患上一些慢性疾病(如：高血壓、心臟病和糖尿病)的風險。
- Sugar contains only energy (each gram of sugar can provide 4 kcal of energy).
- Consuming too much sugar can lead to excessive energy intake and in turn increase the risk of overweight and obesity.
- Frequent consumption of too much sugar can also lead to dental decay.
- Obesity increases the risk for a number of chronic diseases, such as hypertension, heart diseases and diabetes mellitus.

# 糖 Sugars

➤ 游離糖指所有由製造商、廚師和消費者在食物添加的單糖和雙糖，以及蜜糖、糖漿、果汁及濃縮果汁中天然含有的糖。

➤ Free sugars are monosaccharides and disaccharides added to foods and beverages by the manufacturer, cook or consumer, and sugars naturally present in honey, syrups, fruit juices and fruit juice concentrates.

# 能量 Energy

- 能量用以支持人體活動
- 能量需要量視乎年齡、性別、體重及活動而定
- Energy supports activities of human body
- Energy requirement depends on age, gender, body weight and activity level.

# 世衛游離糖攝入量建議

## WHO's free sugar intake recommendations

➤ 以每日從膳食攝入2000千卡能量的人為例：

- 游離糖攝入量少於50克
  - 減低肥胖和某些慢性疾病的風險
- 游離糖攝入量少於25克
  - 除可減低肥胖和某些慢性疾病的風險外，更有助減少蛀牙

➤ For a total energy intake of 2000 kcal/day:

- < 50g free sugar
  - Reduce the risk of overweight and obesity and certain chronic diseases
- < 25g free sugar
  - Provide additional health benefits in the form of reduced dental caries

# 調製茶類飲品的糖含量

## Sugar Contents in Tea-based beverages

- 根據中心取得的資料，估計本港成年人的糖總攝入量的32%來自不含酒精飲品，當中包括汽水、茶及蔬果汁／蔬果汁飲品。
- 此類調製茶類飲品一直受本地市民歡迎，但不少添加了蜜糖、糖漿或濃縮果汁（含游離糖）。
- 故中心和消委會進行聯合研究。
- Based on CFS' available data, it is estimated that 32% of total sugar intake is from non-alcoholic beverages, which consist of carbonated drinks, tea and fruit and vegetable juices/juice drinks.
- These tea-based beverages have become very popular by local population, but many of them have honey, syrup and fruit juice concentrates added (contain free sugar).
- CFS and CC thus conducted this joint study.

# 是次研究 The Study

# 目的 Objectives

- 測試本港一些調製茶類飲品的糖含量和能量值。
- 增加公眾對這些茶類飲品的營養素含量的認識，從而幫助公眾作出知情和適合個人情況的選擇。
- 鼓勵食物業界改良產品配方，減低市面上這些茶類飲品的糖含量。
- To measure the levels of sugar and energy of non-indigenous tea-based beverages provided locally.
- To inform the public on the nutritional contents in these beverages to enable informed choices.
- To encourage the trade to provide beverages with less sugar content through recipe reformulation.

# 研究範疇 Scope of Study (1)

➤ 8種非預先包裝茶類飲品

## 非預先包裝茶類飲品樣本檢出的糖含量 – 「不加糖」樣本

### Total sugar for non-prepackaged samples – “No added sugar” version

- 由於要維持某程度的口味，某些種類就算選擇「不加糖」樣本亦未必能大大減少其糖含量及攝入量，如那些含有蜜糖、濃縮果汁或果味糖漿的飲品。
- 一個「不加糖」樣本亦可視為「含高糖分飲品」。
- 消費者因此要留意就算已調整糖含量，其糖含量有可能不算低。
- In order to maintain the flavor of the beverage in a certain extent, sugar content and intake may not be reduced enormously, such as those contain honey, fruit juice concentrates and syrups.
- A sample of “no added sugar” version could also be regarded as “drink high in sugar content”.
- Consumers should therefore be aware that even sugar level is adjusted, the sugar content may not be low.

配料的糖含量 –  
例子:珍珠

Sugar content of topping –  
e.g. pearl tapioca

# 配料的糖含量

## Sugar content of topping

- 珍珠在飲品中亦是糖分的來源。
- 檢測於「不加糖」樣本的珍珠奶茶樣本中珍珠的糖含量。
- 每100克珍珠的糖含量平均為3.8克。
- 平均每份珍珠提供6克糖，即佔每日游離糖攝入限量的一成二。
- 平均整杯珍珠奶茶的糖含量有超過四分一也是來自珍珠。
- Pearl tapioca is one of the sugar sources in the beverages.
- Measured the sugar content of pearl tapioca in “no added sugar” version of pearl tapioca milk tea.
- Mean sugar content is 3.8g per 100g of pearl tapioca.
- Each portion of beverage provided 6g of pearl tapioca on average, which means 12% of WHO's recommended daily free sugar intake.
- One-fourth of sugar content of each portion of pearl tapioca milk tea came from pearl tapioca on average.

# 配料的能量值

## Energy level of topping

- 配料如珍珠會增加飲品的能量值。
- 以珍珠奶茶為例，一杯「原味」珍珠奶茶平均含**400**千卡，而每份珍珠平均含**170**千卡，即超過四成能量來自珍珠。
- 市民要留意如選擇添加配料，會增加整杯飲品的能量值。
- Topping such as pearl tapioca could increase the energy level of beverages.
- Take Pearl Tapioca Milk Tea as an example, one serve of “regular” version contains 400kcal on average, in which 170kcal (40% of energy of the drink) came from pearl tapioca.
- Consumers should notice that the energy of the whole drink will be increased if choose to add topping in it.

同一種飲品中，每100克也可含有0–6克糖。消費者在購買預先包裝飲品時，應留意營養標籤上的糖含量。

## 結果1：

- 飲用一杯「原味」飲品平均已攝取世衛建議每日游離糖攝入限量的58%，個別同種類茶類飲品樣本的糖含量差異頗大。

這表示消費者可從這些飲品攝入不少糖分，而業界減低這些茶類飲品的糖含量是切實可行的。

## Finding 1:

- One portion of beverage in “regular” version contributed 58% of WHO’s recommended daily intake of free sugar on average. Sugar content varied widely for certain types of tea-based beverages.

This reflects consumers can take in certain amount of sugar from these tea-based beverages, and it is possible for the Trade to reduce the sugar content in these tea-based beverages.

## 結果2:

- 「不加糖」樣本每100克的糖含量比「原味」樣本平均下降45%，而平均游離糖攝入量下降接近一半。

消費者應盡量選擇「不加糖」或「少糖」的飲品。

## Finding 2:

- On average, sugar content per 100g of “No added sugar” version was reduced by 45% when comparing with respective “regular” version, while free sugar intake was reduced nearly by half.

Consumers should choose “no added sugar” or “less sugar” beverages if possible.

## 結果3：

➤ 飲用一杯「原味」飲品平均佔每日能量需要量的14%（以每日2000千卡能量計）。選用脂肪含量較高的材料或添加含有糖分的配料對飲品的能量有直接影響。

業界可選用較低糖／脂肪含量的原材料；而消費者選擇此類飲品時，應注意其能量值。

## Finding 3:

➤ One portion of “regular” version contributed 14% of daily energy intake (for a total energy intake of 2000 kcal/day). Raw materials with high fat content or topping with added sugar could contribute energy to the beverage.

The trade could choose to use raw materials with lower sugar/fat contents; while Consumers should take note of the energy values of these tea-based beverages.

# 給消費者的建議 Advice to Consumers (1)

- 留意茶類飲品的糖含量及能量值。可參考本研究結果及中心的營養資料查詢系統。保持均衡飲食，限制飲用添加大量糖分的飲品。

- 購買這些飲品時如要添加配料，可留意一些配料如珍珠會令飲品的糖含量和能量值增加。
- Take note of the portion size of beverages. Consider the smallest portion size to avoid taking in great amount of sugar and energy. Parents should be aware of the portion of these beverages consumed by children during snack time, to prevent affecting their appetite during main meals. - Make reference to the CFS' "Trade Guidelines for Reducing Sugars and Fats in Foods". If possible, choose raw ingredients with lower sugar/fat.
