The screenshot displays the website interface for the Food and Environmental Hygiene Department's Food Safety Centre. At the top left is the logo and name of the Food Safety Centre. A search bar is located at the top right. Below the header, a breadcrumb trail reads: 主頁 > 出口食物 > 出口食物往內地 > 香港製造食品進入內地市場的便利通關安排. A left-hand navigation menu lists various categories, with '出口食物' (Export Food) selected and expanded to show sub-items: 出口驗證, 出口食物往內地, and 出口商及業界的消息. The main content area is titled '出口食物往內地' (Export Food to Mainland) and includes a share button and a print icon. The primary article is '香港製造食品進入內地市場的便利通關安排' (Facilitated通关 Arrangements for Food Manufactured in Hong Kong to Enter the Mainland Market). The article text states that the Environment and Ecology Bureau and the State Customs Administration signed a cooperation agreement on November 27, 2023, to streamline the process for Hong Kong-made food entering the mainland market. It details the 'Cooperation Framework' where the Food Safety Centre will supervise the food against mainland requirements, and the mainland customs will allow direct release of samples. The 'Facilitated通关 Arrangements' cover three categories of food: (1) beverages and frozen drinks (excluding alcoholic and dairy), (2) biscuits, pastries, and breads, and (3) confectionery and chocolate. The article also mentions that food classification is based on Chinese HS codes and CIQ codes, and refers to a table for more details. The 'Operational Process' section indicates that local food producers need to apply for a 'Facilitated通关 Permit' from the Food Safety Centre before production, provided they meet certain basic conditions.
